TEEN RELATIONSHIP ABUSE PREVENTION (TRAP)

Audience: Grade 8

Complement Classes:

Active Health, Planning, and Leadership

The TRAP workshop creates awareness of healthy and unhealthy relationships. Students learn about relationship abuse, gain skills to better identify an unhealthy relationship, and learn how to help someone else who may be in one. This workshop creates a safe environment for students to discuss this sensitive topic through the use of group discussion, videos, and small group activities. This workshop uses a peer-to-peer model, where senior high students and young adults deliver the workshop to younger students.

"TRAP taught me the early signs of an abusive relationship. The presentation was fun and interesting."

STRESS SENSE FOR ESL CLASSES

Audience: ESL Level 3 and 4

Complement Classes: ESL

An interactive presentation designed to create a safe place for students to identify and talk about their stressors, and learn how extreme stressors can be risk factors for suicide. In addition, they learn about depression and how to manage stress. The session wraps up with an activity on how to help a friend who might be in crisis. Stress Sense for ESL Classes is specifically designed to innovatively engage ESL students by defining new vocabulary, working in small groups, and participating in group discussions.

NEW! EMPLOYMENT LAW 101

Audience: Grade 10-12

Complement Classes: Planning, Leadership and Law 12

Students will gain a basic understanding of employment law in BC. This workshop allows students to test their basic employment law knowledge and to explore employee and employer rights and responsibilities. This is especially important when students begin to seek employment and enter the work force for the first time. The combination of small and large group activities creates a unique space for students to learn and talk about their employment related experiences. Law 12 classes are able to examine relevant case studies.

MANAGING YOUR STRESS

Audience: Grade 10-12

Complement Classes: Planning and Leadership

A fun and insightful presentation aimed at helping senior high school students recognize stress levels and gain useful stress management and coping skills. Some of these skills include effective time management, organization, and assertiveness. These skills are essential in managing and coping with everyday stress, as well as the added stress during exams, final projects, and beginning of life after high school.

SUICIDE AWARENESS

Audience: Grade 9

Complement Classes: English, Planning, and Active Health

Through this interactive presentation, students gain an awareness of warning signs, risk factors, and feelings of suicide. Students will also develop the skills to help someone who may be experiencing a crisis or is suicidal. This workshop gives students a safe environment to talk and learn about suicide through a video and activities.

"What I didn't know before is that suicide is the second leading cause of death for 15 to 24 year olds."

COMMUNICATION SKILLS

Audience: Grade 8-12

Complement Classes: Active Health, Planning, and Leadership

This workshop equips students with the basic helping and communication skills. Through activities, interactive discussions, and role-plays, students will learn and practice effective communication skills, active listening, assertiveness, and how to help someone who may be going through a crisis. This workshop can be booked on its own or can be booked as a complement to our Suicide Awareness, Managing Your Stress, or TRAP workshops.
